**FIXED FRAME AND
BESPOKE BAY SYSTEMS**

TRUST IN TUSKER

TUSKER FIXED FRAME AND BESPOKE BAY SYSTEMS

Heavy duty track system options

We design, manufacture and supply both off the shelf and fully customised solutions for fixed frame systems designed to be used with our Tusker curtain or Tusker strip curtain. We can provide full installation services by our specialist team, if required.

Fixed Track

The top track is fixed directly to the pre-drilled and threaded stanchion uprights.

The system is easy to assemble and the track can be fixed directly to vertical surfaces without any special brackets. Can span unsupported for up to 3 metres.

Retractable Reel

Self-retracting curtain hanger which overcomes the problems arising from access to protected welding areas. When not in use, the curtains are suspended from a pivoting arm which rotates through 180 degrees. Suitable for widths to a maximum of 8 metres.

Strip Curtain System

Designed for use with Tusker strip for doorways, partitioning, welding bays and noise barriers, giving access for personnel and equipment. The simple design enables strip to be easily hooked and unhooked for ease of cleaning or replacement. Extremely simple to install and allows for strip overlap. A heavy duty version is available and essential where forklift access is required. Available in galvanised steel or industrial applications and stainless steel for the food industry.

Continuous Track

Designed for curtain and strip to hang and slide around the track without being hampered by the uprights. Horizontal 90 degree bends available to form booths and hangers for single and double track systems.

Overhead Track

A heavy duty track system designed to be fixed directly to ceilings, fascias, or suspended from structural beams, enabling the workspace to be clear of steel upright supports.

Heavy Duty Welding Table

We can manufacture high quality welding tables to your own specifications to fit your bay or other areas.

- Very heavy duty - 50mm box section base
- Option to powder coat base in any colour
- Comes ready assembled.

TUSKER FIXED FRAME AND BESPOKE BAY SYSTEMS

We design, manufacture and install the very best in quality bay systems

If you're looking for a welding bay, no matter how extensive, Tusker Industrial Safety can deliver. Our technical team will consult with you and design a system to meet your exact requirements.

We've been trusted by some of the UK's most well-known organisations to deliver systems which meet your particular specifications, on time and with the minimisation of down-time being at the forefront of the planning process.

We can provide all the necessary supplementary documentation including technical drawings, risk assessments and method statements and a dedicated project manager will keep you informed at every stage of the process.

Bays can be customised to suit corporate branding requirements

“ The team at Tusker Industrial Safety worked closely with us to fully understand our requirement and deliver an excellent product. Communication was excellent at all stages - before, during and after installation to ensure that we were completely satisfied. I would highly recommend Tusker Industrial Safety”.
